

TRITON

POWER FOR ADVENTURE

Experience the next level of toughness with the all-new TRITON.
Its advanced engineering and ultra-tough features redefine
the reliability and ruggedness of pickups.
Get ready for a new adventure and lifestyle with the TRITON.

Note: Some equipment may vary by market. Please consult your local MITSUBISHI MOTORS dealer/distributor for details.

POWERFUL, CONFIDENT, AND READY TO GO

2.4L
TURBO DIESEL ENGINE

New 2.4L Turbo Diesel Engine

Experience powerful acceleration and responsive performance with 135kW power and 430N·m torque.

Note: Some equipment may vary by market. Please consult your local MITSUBISHI MOTORS dealer/distributor for details.

DISCOVER ADVENTURE ON ANY ROAD

Go anywhere with best-in-class off-road performance, honed through rigorous testing and rallies in harsh conditions all around the world.

Super Select 4WD-II

MITSUBISHI MOTORS' one and only Super Select 4WD-II system provides exceptional all-terrain performance with its four selectable modes, including 4H (full-time 4WD) that delivers great stability even on wet surfaces, and outstanding cornering performance even on dry pavement.

	2H 2WD		4H Full-time 4WD
	4HLC Centre Diff Locked 4WD		4LLC Low Gear Centre Diff Locked 4WD

TOTAL CONFIDENCE

FROM TOTAL CONTROL

Active Yaw Control [AYC]

The AYC system helps you precisely handle slippery roads with gravel and snow, turning the car just as you want – an exciting driving experience for those who enjoy sporty or off-road driving.

Active Stability and Traction Control [ASTC]

ASTC applies brake force whilst cornering to maintain vehicle stability and optimise traction to prevent torque loss. The system adjusts engine output and applies brake force to spinning wheels as needed.

Active Limited Slip Differential (Brake Control Type)

Helps prevent wheel spin on slippery roads by applying brake force to spinning wheels, ensuring better control and road grip.

FREEDOM TO EXPLORE THE NEXT FRONTIER

Hill Start Assist [HSA]

HSA helps prevent rolling backward on steep slopes by maintaining braking force for up to two seconds after the brake is released. This helps ensure a safe start until the accelerator is applied.

Hill Descent Control [HDC]

HDC applies brakes and maintains speed when travelling downhill, for safer steering without manual brake application. Activates at 2-20 km/h in automatic, and in 1st gear at 3-20 km/h in manual vehicles.

Note: Some equipment may vary by market. Please consult your local MITSUBISHI MOTORS dealer/distributor for details.

BUILT TO GO ANYWHERE

New Chassis Frame

The chassis frame is built with high-tensile materials to withstand tough terrain and ensure reliable performance in any condition. It's the foundation of outstanding driving performance and ride comfort on any terrain.

Completely Redesigned Suspension System

The completely redesigned front and rear suspension systems enhance driving performance and comfort by providing superior handling on various road types.

Front suspension

EMPOWERS ANY JOURNEY

The interior is designed for comfort during long trips, with advanced technology and a thoughtfully crafted living space that empowers you to enjoy your ride, no matter where your journey takes you.

9-inch Infotainment System

Enjoy a stress-free and enjoyable time in the vehicle with the intuitive and convenient 9-inch infotainment system that comes with smartphone connectivity and an easy-to-see display.

Combination Meter

The new 7-inch multi-information display puts all the necessary information in front of you, allowing you to easily understand the vehicle's status at a glance. The new meter display also makes recognition effortless.

SPACE TO SHARE AND ENJOY

Seat Comfort

Enjoy enhanced comfort during long rides with the newly designed seats inspired by our rally heritage. The seats provide excellent body support, allowing you to focus on driving and enjoy the journey.

Upgraded Air Conditioning

Stay cool and comfortable even on hot days with the improved A/C system. The front A/C unit provides exceptional cooling performance to keep you refreshed during your drive. Plus, the rear air circulator keeps passengers comfortable with airflow adjustable to their personal preferences.

MODERN INTERIOR FOR PROFESSIONALS

User-Friendly Components

The interior is designed to enhance your driving experience with user-friendly components that are intuitive to use, with every detail crafted with your comfort and convenience in mind.

Easy-to-Grip and Comfortable Steering Wheel

Glove-Friendly and Intuitive Air Conditioning Switches

Soft-to-Touch and 3D-Shaped Intuitive Door Handles

Convenient Tech and Storage Solutions

Make your drive convenient and enjoyable with an interior equipped with tech and storage solutions. Stay organised with ample storage space for all your items.

Smartphone Wireless Charger

Rear USB Ports (A&C Type)

Upper Glove Box

THE ULTIMATE WORKHORSE

THAT GETS THE JOB DONE

Single CAB

Double CAB

Big and Practical Cargo Space

Easily carry all your essentials, including a Euro pallet, with the versatile cargo bed. It's designed to handle everything you need, and more.

Practical Features

Wide Side Step

Designed to provide slip-resistant footing for safe and easy entry and exit from the vehicle, even in wet or slippery conditions.

Rear Bumper Corner Shape

The rear bumper corner allows for more foot space when the tailgate is open, and it has the largest step area in its segment.

2x4 Lumber Attachment

Easily divide your cargo space with the 2x4 lumber attachment.

Rear Inner Hook Placed Low

Low-placed rear inner hook allows for easy and secure tie-down of loads.

PEACE OF MIND WITH ADVANCED SAFETY FEATURES

Mitsubishi Motors Safety Sensing [MMSS]

MITSUBISHI MOTORS offers advanced safety features through MMSS, giving our customers peace of mind during every adventure and ensuring a safe return home.

Forward Collision Mitigation system [FCM]

FCM can help detect vehicles and pedestrians and alert the driver with audio and visual warnings, as well as apply the brakes to avoid or reduce potential collisions.

Lane Departure Warning [LDW]

LDW warns the driver with visual and audible alerts when the vehicle unintentionally crosses lane markings at speeds over 65km/h, using a windshield-mounted camera.

Adaptive Cruise Control [ACC]

ACC uses advanced radar and camera technology to judge the distance to the vehicle ahead and automatically adjusts the car's speed to maintain the set driving distance.

Blind Spot Warning [BSW] with Lane Change Assist [LCA]

Rear bumper radar sensors detect vehicles in blind spots on both sides. If a vehicle is detected whilst the turn signal is on, an indicator blinks in the corresponding side mirror and a buzzer sounds.

Rear Cross Traffic Alert [RCTA]

When reversing, if radar sensors detect a moving vehicle, the system warns through visual, audible, and side mirror alerts, helping to enhance safety and prevent potential collisions.

Automatic High-Beam [AHB]

Automatically switches headlights between low and high beam based on the presence of a vehicle ahead for safer and more comfortable night-time driving.

Note: The radar wave graphics are for illustrative purposes only and do not represent the actual sensor application. Drivers are fully responsible for their own safe driving. Please drive safely and do not rely solely on these systems whilst driving. Some equipment may vary by market. Please consult your local MITSUBISHI MOTORS dealer/distributor for details.

Connected Services

MITSUBISHI CONNECT offers connected services for safe and convenient driving, accessible through a smartphone app.

Safety

- Automatic Collision Notification
- SOS Emergency Assistance (eCall)
- Roadside Assistance

Security

- Stolen Vehicle Assistance
- Remote Door Lock/Unlock
- Parental Control
- Over-the-Air Update (Firmware Update)

Comfort & Convenience

- Remote Climate Control
- Vehicle Status Report
- Information Assistance
- Car Finder (GPS)
- Mileage Tracker
- Remote Horn, Lights

My MITSUBISHI CONNECT App

MITSUBISHI CONNECT services can be accessed through a smartphone app available on both Apple App Store and Google Play, providing easy access to all available services.

Note: Apple is a trademark of Apple Inc., registered in the U.S. and other countries and regions. App Store are a service mark of Apple Inc., registered in the U.S. and other countries and regions. Google Play is a trademark of Google LLC.

CONNECTIVITY IN THE PALM OF YOUR HAND

STRONGER. STURDIER. TOUGHER.

There's no limit to how tough you can be. Reach new levels of toughness and make your TRITON even more capable – and truly your own.

Why Genuine Accessories?

We design and test our genuine accessories to seamlessly integrate with our vehicles for safety, functionality, and durability. Our accessories comply with regional regulations and are available globally thanks to our strong development, procurement, and Japanese manufacturing tradition.

DESIGN

We design and develop our genuine accessories alongside our vehicles to ensure they harmoniously and seamlessly integrate with the vehicle's original design.

SAFETY

We rigorously test all our genuine accessories to meet safety standards and ensure they work seamlessly with the vehicle's advanced safety equipment.

DURABILITY

We test our genuine accessories under various conditions for durability, which is essential for safety. If any issues arise, we analyse them to improve both the accessories and the vehicle itself.

FUNCTIONALITY

We design our accessories to improve vehicle functionality and meet regional requirements, whilst also considering how they work with advanced safety features.

Note: These accessories are not covered by the vehicle warranty and are subject to the conditions of the accessory warranty. For warranty conditions regarding these accessories, please contact an authorised MITSUBISHI MOTORS dealer. Some equipment may vary by market. Please consult your local MITSUBISHI MOTORS dealer/distributor for details.

* Measured by MITSUBISHI MOTORS CORPORATION. Your actual mileage will vary depending on how you drive and maintain your vehicle.
Note: These specifications are subject to change without notice. Please consult your local MITSUBISHI MOTORS dealer/distributor for detailed specifications.

Note: **•ASTC:** The control capabilities of Active Stability and Traction Control [ASTC] are supplemental only. Please drive safely and never rely solely on these functions whilst driving. Be sure to use the same specified type and size of tyres on all 4 wheels. Do not instal any aftermarket limited slip differential on your vehicle. **•HSA:** Hill Start Assist [HSA] is not a substitute for safe driving. Never rely solely on this function whilst driving on steep roads. Your vehicle may move backwards if the brake pedal is heavily loaded, or if the road is very steep or slippery. This function is not designed to keep the vehicle stopped in place on uphill slopes for more than 2 seconds. Do not rely on this function to maintain a stopped position as an alternative to depressing the brake pedal. **•HDC:** Hill Descent Control [HDC] is not a substitute for safe driving. Never rely solely on this function whilst driving on steep roads. When driving on slippery roads such as muddy, icy, or unpaved roads, your vehicle will not allow you to stay at a certain low speed, which may lead to a serious accident. **•FCM:** The detection and control capabilities of Forward Collision Mitigation system [FCM] are supplemental only and do not prevent collisions in every situation. FCM may not detect vehicles and pedestrians in some situations. Auto braking is activated for a car ahead when your vehicle is travelling at a speed of above approx. 10 km/h and for a pedestrian ahead at approx. 10 km/h to 80 km/h. Since FCM has no function to maintain braking, the brake is released approximately 2 seconds after stopping. To prevent the vehicle from rolling thereafter, the driver may have to hold the brake pedal down. In some cases, FCM may not function if the driver takes actions for accident avoidance through steering or acceleration operation. **•LDW:** Lane Departure Warning [LDW] is not designed to lessen risks associated with not looking ahead carefully (attention drawn to something on the side, absentmindedness, etc.) or poor visibility caused by bad weather etc. Keep steering your vehicle correctly and drive safely. The system may not be able to detect the lane correctly in some conditions.

DIMENSIONAL VIEWS

DOUBLE CAB (GT)

SINGLE CAB (GL)

All measurements in millimetres

•ACC: The detection and control capabilities of Adaptive Cruise Control [ACC] are supplemental only. ACC may not be activated in some situations. This system may not correctly detect the actual situation depending on the type of vehicle in front and its conditions, the weather conditions, and the road conditions. Additionally, the system may be unable to decelerate sufficiently if the vehicle in front applies the brakes suddenly or another vehicle cuts into your path, so your vehicle approaches the front vehicle. The operating speed range is approx. 25 km/h to 144 km/h. **•BSW/LCA:** The detection and control capabilities of the Blind Spot Warning system [BSW] / Lane Change Assist [LCA] are supplemental only and do not warn you of vehicles in blind spots in every situation. Please do not rely solely on this system whilst driving. BSW/LCA may not operate normally in some cases, depending on traffic, weather, road surface conditions and the presence of obstructions. **•RCTA:** Do not rely solely on Rear Cross Traffic Alert [RCTA], which may not detect all moving vehicles in certain conditions. **•AHB:** This system activates at a speed of approx. 40 km/h or more and deactivates at lower speeds.

Drivers are fully responsible for their own safe driving. Please drive safely and do not rely solely on these systems whilst driving. Please see the owner's manual for additional information. If you have any questions, please consult your local MITSUBISHI MOTORS dealer/distributor for details.
